made last year. The reference report indicates that almost only outgoing shipments were observed at the Mustrow firing range. officer of a unit in Terlin-Gruenau. These loadings probably involved units of the IV Arty Corps. In 1951, the units of the 7th Ods Necs Div did not return to their posts before the second half of October. It is believed that this train carried elements of the 312th Cds RL hegt of the Fourth Cds Mecz Army, which had participated in the emercises held by this army in the area south of Rathenov-Mennhausen. This unloading was connected with a previous unloading observed from Eberswalde. 25X1 As the maneuvers of the Third Shock Army were not completed at the date of unloading, the units involved possibly belonged to this army. 25X1 observed the detraining of units of the 6th Gds Lecz Div in Bernau on 26 September It is believed that units of this division returned to their posts after the completion of summer exercises which terminated about three weeks earlier than in 1951.
